

RAHUL KRISHNAN R

Cybersecurity Engineer | Threat & Vulnerability Management | Security Automation & AI

+91 8606400331 | Rahulkrishnan2364@gmail.com | [linkedin.com/in/rahul-krishnan-r-662751159](https://www.linkedin.com/in/rahul-krishnan-r-662751159) | Bangalore, India

PROFESSIONAL SUMMARY

Experienced IT professional with over 9 years of dedicated expertise in Cybersecurity, specializing in vulnerability management, Patch Management, and attack surface reduction to safeguard organizations against evolving threats. Demonstrated ability to identify, assess, and remediate security risks through detailed vulnerability assessments and risk-based remediation strategies. Skilled in endpoint protection, email and web security, patch automation, and security tool optimization using industry-standard platforms such as CrowdStrike, Qualys, Abnormal Security, and Zscaler. Adept at aligning cybersecurity practices with global standards while maintaining operational efficiency and compliance. Passionate about driving continuous security improvement, mentoring teams, and advancing proactive cyber defence initiatives.

CORE COMPETENCIES

- Security Operations & Incident Response
 - CrowdStrike Falcon (EDR /Firewall)
 - Secure Web Gateway (Zscaler ZIA)
 - Data Loss Prevention
- Vulnerability & Patch Management
 - Next-Gen SIEM & Log Management
 - Network Detection (Vectra NDR)
 - OT/xIoT & SaaS Security Posture
- AI-Driven Security Automation
 - Email Security (Abnormal/Proofpoint)
 - Identity Threat Protection & IAM
 - Continuous Threat Exposure Management

PROFESSIONAL EXPERIENCE

KOKI Group / HiKoKi Power Tools — Bangalore

Cybersecurity Engineer — Global Security Operations

2024 — Present

- Monitor and investigate high/critical alerts across CrowdStrike Falcon, Microsoft Defender, and Vectra AI NDR; manage full incident lifecycle from triage through root cause analysis and post-incident documentation.
- Lead global vulnerability management using CrowdStrike Exposure Management across 8,000+ endpoints in 15+ countries, coordinating patch scheduling and remediation with regional IT teams.
- Design and implement CrowdStrike Fusion Workflows automating SOC operations including IOC management, firewall rule enforcement, USB device control, and security tool deployment via RTR.
- Develop Python-based security automation integrating CrowdStrike, Zscaler, and Abnormal Security APIs — automating quarantine analysis, threat intelligence correlation, and endpoint remediation workflows.
- Administer Zscaler ZIA for secure web gateway enforcement globally: firewall rules, SSL inspection, URL allowlisting, and cross-platform telemetry integration with CrowdStrike.
- Manage Abnormal Security email platform — tune detection policies, investigate phishing/BEC threats, and perform malware analysis using ANY.RUN sandbox prior to quarantine release.
- Operate Next-Gen SIEM: alert triage, dashboard design, log source onboarding, data ingestion troubleshooting, and security telemetry coverage validation.
- Investigate identity threats including credential compromise, anomalous authentication, and identity misuse across Active Directory and Azure AD environments.
- Administer CrowdStrike Falcon Firewall Management and endpoint protection: device control policies, prevention rules, exclusion management, and 100% agent compliance enforcement.
- Deploy OPatch micro-patching for EOL servers; automate patch rollouts via PDQ Connect with staged testing, CAB approvals, and post-deployment validation.
- Manage OT/xIoT vulnerability visibility and SaaS Security Posture Management (SSPM), coordinating remediation with engineering and application teams.
- Implement data classification, DLP policies, and support GRC initiatives via ISMS.online — risk assessment, policy development, and ISO 27001 audit readiness.
- Monitor external posture via SecurityScorecard; perform counter-adversary intelligence tracking exposed domains, leaked credentials, and vendor ecosystem risks.
- Deliver executive security dashboards and regional reports covering incident metrics, vulnerability trends, compliance scores, and KPIs.

7-Eleven Global Solution Centre — Bangalore

2021 — 2024

Information Security Engineer — Threat Intelligence & Vulnerability Management

- Conducted threat intelligence analysis using Recorded Future, CrowdStrike Falcon enabling proactive detection of malware outbreaks and emerging threats.
- Led vulnerability management lifecycle using Tanium, Qualys VMDR, SCCM, and WSUS across 10,000+ endpoints; reduced critical findings by 40% within SLA.
- Built executive security dashboards delivering real-time visibility into remediation progress, asset compliance, and organizational risk posture.
- Delivered security awareness training programs, reducing phishing click-through rates by 35% year-over-year across the organization.

Cognizant Technology Solutions — Coimbatore

2019 — 2021

Tech Lead — Banking & Financial Services

- Executed vulnerability remediation using Qualys agent-based scanning across 3,000+ banking workstations, automated daily reporting and stakeholder communications.
- Managed SCCM application packaging and patch management for Windows endpoints, maintaining 99.5% deployment success rate and zero critical unpatched assets within SLA.
- Developed Power BI vulnerability analytics dashboards; coordinated CAB approvals ensuring change management compliance in regulated environments.

Tech Mahindra Ltd — Bangalore

2016 — 2019

Associate System Engineer — Endpoint & Patch Management

- Managed patch lifecycle for 100,000+ Nestle servers/workstations using SCCM and MBSA; achieved 95% compliance exceeding quarterly SLA targets.
- Performed application packaging, vulnerability remediation across multi-site India infrastructure; recognized with 3x performance awards.

TECHNICAL SKILLS

Security Platforms: CrowdStrike Falcon, Qualys VMDR, Tanium, Next-Gen SIEM, Vectra NDR, ESET

Email & Web Security: Abnormal Security, Proofpoint, ANY.RUN Sandbox, Zscaler ZIA, FortiClient VPN

Endpoint & Patching: SCCM/MECM, PDQ Connect, Ninja One, ManageEngine, WSUS, OPatch, GYTPOL

Automation using AI: Python (FalconPy SDK, Requests, Pandas), PowerShell (WPF, REST APIs), CrowdStrike Fusion Workflows, SQL

Identity & Data: Active Directory, Azure AD, PAM, DLP, Data Classification

Frameworks: NIST CSF, ISO 27001, MITRE ATT&CK, CIS Benchmarks

CERTIFICATIONS

ISC2 CC | Google Cybersecurity | CrowdStrike VM | Qualys VMDR | Qualys VM | Tanium Patch | Tanium Deploy | Proofpoint Security Awareness | Proofpoint Email Auth | Proofpoint AI Email Security | CISM (In-Progress)

EDUCATION

Bachelor of Computer Application (BCA) — Annamalai University (Distant)

2017 — 2020

Diploma in Electrical & Electronics Engineering — Carmel Polytechnic College

2012 — 2015
